

Shaping the effortless laundry

Line 6000 Dryers

You talk...

Help me run a first-rate laundry where I get the absolute best results while reducing effort and costs. I need my team to get more done faster, thanks to an ergonomic design that reduces physical strain and a clear, attractive interface. Give me robust equipment that will save me money thanks to lower life cycle costs, year after year.

...we listen

Line 6000 will save you money, anticipate your needs, and exceed your expectations. Our intensive research and cutting-edge product development have led to an ergonomic line of washers and dryers that ensures effortless operation and exceptional savings. We connect you to the cloud to give you remote control over your operations, at all time. Come with us and discover how great your business can be.

Innovation is the driver of great performance

Easier, healthier, safer

Certified ergonomic design with a human-centered approach for an outstanding user experience.

Real-time solutions

Monitor your equipment's status and performance from anywhere and take action to improve your business.

Long-term savings

Innovative features to save money and time, and embrace a sustainable lifestyle.

Outstanding productivity

Wash and dry more laundry in less time.

Easier,
healthier,
safer

Our priority is to create solutions designed precisely for the people who use them, day after day. **Exceptional results for minimal effort:** it's as simple as that.

Our design is all about you

Anyone who dries laundry day in and day out knows that repetitive acts like reaching and bending can be stress points that make the job more difficult and reduce productivity. By focusing on the physical and cognitive interaction between user and equipment, **we make each of these motions more comfortable for an all-around effortless experience.**

Certified comfort

The user interface has passed third party external testing and the new range is **certified to international standards of ergonomics** and human-centered design.

Our dryers have earned **the prestigious 4-star rating for ergonomics**. This means they have been user-tested to make sure your operators will feel less tension and strain, so they—and your business—can thrive.

Pioneers in usability

Ergonomic interventions can reduce work-related musculoskeletal disorders (WMSDs) by **59%**, with an average decrease of **75%** in sick days and a **25%** increase in productivity.

Washington State
Department of Labor & Industries

Experience 4-stars

Compliance with ergonomic principles
Designed with you in mind

Evidence-based anthropometric & biomechanical compliance
Reduced risk of injury

Evidence-based usability
The culmination of years of professional studies and expertise

Human-centered design
To make laundry simple and stress-free

Work comfortably, dry more in less space

Space-saving

The new range **takes less than one square meter** of floor space, regardless of heating system (gas, electric, steam or heat pump).

The door that makes the difference:

A better grip

Open and shut the door smoothly thanks to the handle design and easy-close magnetic door.

Safer for users

The insulated glass door stays cool on the outside so there is **no risk of burned fingers or hands**. It also keeps the heat inside, so the room temperature is not affected.

Ideal height

The door is positioned at the most ergonomically **suitable height**. This makes a real difference for loading and unloading.

Sturdy and reliable

Because the door is **built to last**, it will optimize performance throughout the life of the dryer.

Watch the video and find out more!

A filter drawer right where you need it

Maximum comfort

The horizontal filter drawer is positioned for **easy access and cleaning** without the need to bend down. Human-centered design down to the smallest details **takes the stress out of a physically demanding job**.

Big benefits in a smaller size

If you put a premium on space, we have the solution for you. The TD6-7 Dryer is a **full-featured professional model** in a compact size that **stacks seamlessly** with our smaller washer. Use it alone or as part of a tower: the new Compass Pro (R) interface can be placed at the top or the bottom of the dryer to keep it in easy reach.

With its smaller footprint, this dryer fits into challenging spaces or leaves you room to install more equipment, while still providing optimal results and unbeatable productivity.

Dry **70** kg per day in
less than **0.4 m²**!

Stackable!

Here you see the TD6-7 with the control panel at the top. Stacking over a washer or another dryer? No problem: the panel can be moved to the bottom.

Smart interface

The Compass Pro® microprocessor works through a large screen where you can select your program easily in your choice of language. Quick-select buttons for frequently used programs and intuitive new icons for normal/low temperature, delicates, and other options.

Long-term
savings

You know how
expensive it can be to
run a laundry business.
Let us **keep your costs
down** so your business
can reach new heights.

Look under the surface to see how much you save

When considering the cost of an investment, the up-front expense is just the tip of the iceberg. Operating costs accumulate, year after year, and make up the largest share of your expense. Over the long term, **our dryers will cost you much less and make your investment more profitable.**

From intelligence to Excellence

By considering our customers' needs, ideas and suggestions, we create smart solutions that make our customers' work lives easier and more profitable.

We make breakthroughs to save you money

Line 6000 is several laps ahead of other dryers in terms of energy savings and speed. This is good for the world around us and good for your bottom line. By investing heavily in **advanced technology**, we have achieved **outstanding drying times** while also reducing the dryer's life cycle costs.

Heat Pump Dryers: where sustainability meets performance

Heat Pump Dryers have always been good at saving energy. Ours takes it a step further and **saves you more than 60% compared to traditional dryers!**

In the past, the tradeoff for energy savings through heat pump technology was slower drying times. Electrolux Professional has **changed the rules when it comes to Heat Pump Dryers and performance.**

Save more than
60%
on energy

Best result with all fabrics

From delicate silk to heavy cotton: manually **adjusts the drum speed to control the mechanical action**. Garments will move correctly in the drum for the fastest drying.

Efficient in every way

The Heat Pump line is suitable for installation almost anywhere thanks to a small footprint and **plug & play capabilities**. This saves money on installation costs because there is no need for exhaust or a water cooling system.

No need for:

- exhaust
- water cooling system

Install it anywhere and save money!

More exciting news in dryer technology

High performance, less noise

The **Adaptive Fan control*** **adjusts the fan speed automatically to save energy, reduce drying time, and provide an even drying result.** It can also be used to reduce the noise level when needed, and makes it easier to install dryers in a challenging environment. Adaptive Fan turns on automatically, for example if filters are clogged or if ventilation ducts are too small. It also makes the fan last longer, to save you time and money.

*The Adaptive Fan control is only available with the electric version.

Adaptive Fan control can also be important when you have more than one dryer in a series:

If your ventilation duct grows wider and the filters are clean

If your ventilation duct has a constant diameter:

Adaptive Fan will compensate by adjusting the fan speed of each dryer, to **keep air flowing efficiently.**

For all of our dryers

Moisture
Balance

Dry not overdry

Moisture Balance measures the exact moisture level throughout the drying process. Protects garments and saves energy by stopping as soon as they are dry, or at the moisture level you set.

Outstanding productivity

The laundry business is hugely time-intensive. Faster equipment means you can handle more loads of laundry in a day: **the easiest way to make your business more productive.**

Dry more. In less time

Achieving success lies in meeting customers' expectations and grounding them in reality by delivering **products that satisfy business needs.**

With Line 6000, there is no such thing as compromise, and you can finally **have it all.**

**Maximum productivity
and consistently ideal
results, time after time.

**Satisfied
customers**

**Greater
profits**

The most productive dryer you can buy

There is no other dryer that can **handle the volumes** ours does in the same amount of time. You will be amazed by how fast you can move loads of laundry and how much your business can accomplish.

16 KG in **42** MIN*

Shortest drying time on the market

That's a performance like no other in the industry!

*At rated capacity, 100% cotton load at 50% initial moisture dried to 0%.

Dry more garments in less time

The smaller dryer takes 42 minutes* to dry 6 kg of garments. Choose the larger model and you will be even more productive!

*At rated capacity, 100% cotton load at 50% initial moisture dried to 0%.

Did you know?

To dry this load in the same amount of time, **with other brands you would need two dryers instead of one!**
