

Your partner for alternative textile care

The fresher company.

The alternative solvent with excellent cleaning power!

Actually better.

We offer complete solutions

...FOR ALL PROFESSIONAL SERVICE PROVIDERS AND COMPANIES WITH A FOCUS ON CLEANLINESS, HYGIENE AND DISINFECTION.

SEITZ is an innovative German family-owned company

with international alignment that has committed to the development of target-group-oriented solutions in all areas of professional cleaning, hygiene and disinfection.

Well advised with SEITZ

We offer products, concepts and system solutions, if you have any questions concerning commercial and industrial textile care, kitchen hygiene, room care and disinfection. Our offer is targeted at companies and service providers that also have the tasks of caring for and maintaining materials, protecting the environment and protecting people from infections and disease.

All SEITZ products share one thing

They are efficient in consumption, highly effective and serve to facilitate work. We always strive to make our products as harmless as possible work-technically. Among the raw materials, we ensure that they are bio-degradable where possible.

The Name SEITZ has a long tradition for careful progress

We have been and are striving for the development of innovative interlocking product systems and thought-through procedures, pioneering technologies and customer-oriented services by which you as a customer can improve your competitiveness.

In spite of all economic efficiency, we are at the same time aware of our responsibility for the following generations – we focus on not negatively impairing the environment and effectively and efficiently using resources.

On the following pages,
we want to introduce
our new solvent **intense®**
to you, which offers
new options for textile
care in solvents in
combination with our
products and procedures.

Welcome!

125 years of experience

are included in our daily work. In our in-house lab and technical development centre, we develop products, procedures and machines for national and international use and check them for efficiency and effectiveness in application technology.

We listen

when our customers report on their requirements, wishes and problems. This is where our development and research department needs to find innovative solutions.

Everything under control

Our products, procedures and plant technologies are subjected to continuous review and optimisation. This way, we can continually develop and improve quality and efficiency of our offer.

We purchase our high-quality raw materials and materials from carefully selected suppliers that meet equal quality and highest standards.

Every incoming raw material and every outbound product is routinely reviewed. Only this way can we ensure highest quality and safety that is also reflected in our DIN EN ISO 9001 certification.

Your SEITZ-Team

The fresher company.

INTENSE

Intense, thorough and effective

A true alternative to textile cleaning!

Alternative solvents have for some time been a good replacement for textile care in perchlorethylene. The further development of the machine technology also increases the range of the solvents that can be used in these machines.

intense® is the latest development of SEITZ – a highly effective solvent for state-of-the-art textile cleaning.

intense® has an outstanding cleaning effect, but is also suitable for sensitive, high-quality textiles with applications.

The effectiveness is particularly convincing where stain removal is concerned – as the chart shows – and the connected time and cost savings in pre-and post-detachment.

intense® is an environmentally compatible solvent. It contains no carcinogenic substances. Harmful influences on man or environment (air, ground water or soil) are not known. The increased flash point of intense also ensures safe handling and transport purely work-technically and is not a hazardous substance.

intense® is able to take up a certain amount of moisture. This makes it much easier to remove water-soluble contamination and stains from tissue. Furthermore intense can dissolve fat- and water-based stains easily with its molecular structure and high Kb value. In cooperation with the outstanding aids of SEITZ, the clothes become much cleaner, stay smoother and are easier to iron. This saves time and costs in aftertreatment.

intense® cleans gently and leaves textiles in their original form. This makes finishing even simpler and faster.

1890

1990

2015

The undisputed advantages:

intense[®] is odourless and

- has a high cleaning effect
- ensures unusual cleanliness
- outstandingly solved water-soluble stains
- is gentle on the fabric
- reduces pre-detachment
- can be used in any multi-solvent machine and can be replaced easily
- reduces the effort when finishing
- can be disposed of via the classic disposal paths

Energized intense[®]

Another advantage of the new solvent is the possibility of heating it (energized procedure), by which it cleans easily with fewer problems and better than perchlorethylene and HC.

The products

Pre-brushing Agent

Polysol KWV

Pre-brushing agent for universal application

Outstanding for pre-detachment of particularly stubborn stains. Solvent and softening effect on wet and grease contaminations. The goods share for post-detachment is essentially reduced so that the operating passage of the cleaned goods is much accelerated.

Dry cleaning Detergent

Frankotex Fresh HC

Cleaning amplifier with freshness system

Contains anionic and non-ionic surfactants, anti-static and grip-producing components and scents. The unique FreshClean system prevents unpleasant smell residues and gives the goods a pleasant smell.

Intensive Dry cleaning Detergent

PureClin SAN

Hygienic cleaning amplifier for HC with deodorant system

With the new surfactant combination of **PureClin SAN**, hygienic freshness and deep cleanliness of the goods is achieved. The product reliably prevents electrostatic charging and lint formation on the textiles during drying and facilitates finishing.

Spotting Agent

Solvex 1 – 3

Spotting agents for pre- and post-spotting

These effective detaching agents are suitable for HC and PER.

Solvex 1 serves to remove grease and colour stains, **Solvex 2** is used for blood- and protein-containing stains and **Solvex 3** to remove tannin and tannin-containing stains.

Finishing

Cetox KWI

Fluorocarbon resin based **water repellent** with Avivage

Liquid dry impregnation with tissue protection for HC solvents.

Serves easy water-repellent equipment of sport, weather and leather clothing.

The ready-to-use solution – together with effective protection against stains and dirt – produces an outstanding bead-off effect.

Technical competence in theory and practice

SEITZ – Consulting and Service

If you decide to use SEITZ products, you are trusting in a traditional company that not only specialises in pure product sales, but also supports you personally with comprehensive service. The trained employees of our application technology and field service use their outstanding specialist knowledge and long experience to make work with our products and procedures as pleasant as possible.

As you could learn in the brochure, we offer a comprehensive concept that was specifically developed for each goods type. Well thought-through construction kit systems for perfect textile care.

Impressive application technology

We offer overall solutions for washing, wet and dry cleaning.

We offer a wide product range for dosage of our products. Dosage pumps and our technology department ensure individual and precise solutions for dosage of chemicals. Make an appointment with our field service employees right away!

Consulting and training of your staff

SEITZ offers extra-occupational trainings and helps simplify handling and avoid errors. The offered trainings turn your employees into outstanding specialists and end with a qualification test.

POSSIBLE SUBJECTS INCLUDE: washing procedures, product use, hygiene and quality standards, fibre science, care marking, goods sorting, detachment training and complaint handling. Your employees will be kept up to date on all subjects and new employees will be trained to become competent users without delay.

Ask about our comprehensive services and offers.

WE WILL SUPPORT YOU WITH ACTION AND ADVICE
