

Frankopal W

Concentrated liquid soil and grease solubilizer

Frankopal W is used in wet-cleaning and laundry for removal of pigment and grease-bound soilings on white and coloured textiles made from natural and synthetic fibre materials.

Frankopal W has a neutral pH-value and is used for local pretreatment of stains.

Frankopal W has a very good wetting and emulsifying capacity and can be employed in all machine systems.

Frankopal W can be combined with all pre-wash, sole wash or full wash detergents.

Physico-Chemical Data:

Consistency:	liquid	
pH value:	~ 8,3	(1 % solution)
Density:	~ 1,025 g/ml	(20 °C)

Application:

Frankopal W offers best pigment soil solubilizing power when undiluted but, if needed, it can also be used diluted with water at a 1 : 1 ratio.

Apply **Frankopal W** with a brush directly on the stained area prior to treatment. After a short reaction time of 10 minutes, the textiles can be wet-cleaned or washed.
