

Sigma Intense

Drycleaning Detergent with *Fresh System*

Sigma Intense has been developed especially for the solvent **intense®** and contains antistatic and components improving the handle as well as fragrances.

Sigma Intense renders excellent drycleaning results on wet-bound and pigment soil, even without the addition of water, besides offering good stain-removal, clearly defined colours and reliably prevents greying.

Sigma Intense reliably prevents electrostatic charges and lint formation on the cleaned textiles during drying.

Recommended Dosage:

Single Bath Procedure	Twin Bath Procedure 1st Bath	Twin Bath Procedure 2nd Bath
5-7ml/ kg	*	3-7ml/ kg
* Use drycleaning activator.		

Basically speaking, the above dosages are related to the machine load capacity.

Ecology:

Sigma Intense meets the requirements for biodegradability according to the EC Regulation No. 648/2004 on Detergents.

Sigma Intense meets the requirements imposed by the 31.BImSchV and

- is exempt from halogens
- has a flash-point above 61 degrees C
- is thermally stable under operation conditions and exempt from substances according to § 3 para.. 2 or 3 (Annex III 3.1.2. d)

Storage conditions and maximum storage time: see relevant safety data sheet
