

Activate intense®

The fresher company.

Drycleaning Activator

The information provided herein is given on an advisory basis which does not imply any liability on our part. For further details see our relevant safety data sheet.

Activate intense® is a drycleaning activator for use in **intense®** solvent. **Activate intense®** is a unique combination of high-grade anionic and non-ionic surfactants enabling use in connection with cationic SEITZ drycleaning detergents.

Activate intense® renders excellent drycleaning results on water-soluble soiling. Water addition up to 1% (10ml/kg) is possible. By use of **Activate intense®**, numerous stain substances can be removed, which considerably reduces the work in pre- and post-spotting.

RECOMMENDED DOSAGE

Basically speaking, the dosage is related to the machine load capacity.

Single Bath Procedure	Twin Bath Procedure 1 st Bath	Twin Bath Procedure 2 nd Bath
*	5 – 10ml/kg	*
*Use drycleaning activator		

ATTENTION!

Activate intense® must not be used as pre-spotting agent. The textiles must not get into contact with undiluted product. We recommend the use of a dosing pump and an automatic dosing system into the drum or the needle trap.

In case of addition into the drum by hand, pay attention that the textiles do not get into direct contact with the product as this might cause colour damage !

ECOLOGY:

Activate intense® meets the requirements for biodegradability according to the EC Regulation No. 648/2004 on Detergents.

Activate intense® meets the requirements imposed by the 31.BImSchV and

- is exempt from halogens
- has a flash-point above 61 degrees C
- is thermally stable under operation conditions and exempt from substances according to § 3 para.. 2 or 3 (Annex III 3.1.2. d)
