#### SINNER DIAGRAM

## WET CLEANING IS THE BEST SOLUTION FOR ITS EFFICACY

80%

 $80\,\%$  of stains nowadays are soluble in water. Then... Why is the market still using which is only prepared for 20 % of stains? The solution is Wet Cleaning.

20 %

Only 20 % of stains are not soluble in water (Dry Cleaning concept).

DRY vs WET comparison in most common stains:

|               | DRY CLEANING | WET CLEANING |
|---------------|--------------|--------------|
| TYPE OF STAIN |              |              |
| Sweat         | 2            | 5            |
| Proteins      | 1            | 5            |
| grease        | 5            | 4            |
| body odors    | 1            | 5            |
| shrinking     | 3,5          | 3            |
|               |              |              |

## Full flow

Wash water recirculation kit to enhance its use. Increases the effectiveness without mechanical action, for the best care for the clothes

- Can be activated at any phase of the wash.
- Can be applied to any model of washer.
- Lower mechanical action of the pump.
- Greater flow of water with chemical product.
- All the water of the wash is used, including the water not usually used which is in the drain tube.
- Improved mixing of the chemical product.
- Clothes rapidly compacted.

## Total control with touch plus control

Easy programming through icons, with touchscreen directly on the machine or with the computer and Wash Control software.

Important icons for Wet Cleaning:

Filling with Emptying with stopped drum stopped drum

#### Hot & Cold Mix

Automatic water mixing system at different temperatures.

## Liquid dosing

Dosing at the right time, with the necessary amount, gives us security during the process and homogeneity in the result.

And the most important thing: tranquility.

8 dosis signals as standard + 6 extra signals (dosing time, delay, start selection) for all models.

#### Efficient drum

Through a series of perforations in the paddles of the drum, a water cascade effect is achieved which considerably increases the mechanical action.

## Stainless steel drum

Drum in mirror-polished stainless steel.

## Green flow system

Hot air recovery system.

## Temperature control

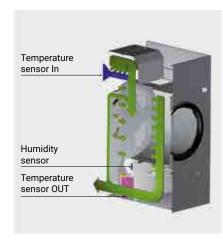

Temperature and air-flow control result in the perfect drying for delicate garments.

The humidity sensor helps to shorten the drying process, thus ensuring the appropriate humidity level for the subsequent ironing of garments.

## Mixed flow

Axial-radial mixed flow system with complementary air inputs, achieving an even better optimised flow and dry

## Soft touch

The perforated drum with inbuilt holes prevents textile wear and lengthens the life of the clothes.

## Double skin

The whole circuit in contact with the hot air of the dryer has been thermally insulated; double-glazed door.

## Reverse drum

Reverse spin.

#### **iDRY**

The new intelligent humidity sensor.

# Application fields

HOTEL INDUSTRY | CARE HOMES | DRY CLEANER'S | RESIDENCES...

# The professional Stacking

The easiest and most economical way to get started in the Wet Cleaning process. The professional Stacking is the most accessible solution of Wet Cleaning for 8 and 10 kg machines, that is to say, 4.5 and 6 kg of delicate garments.

As well as industrial machines, the professional Stacking includes easy programming Touch Plus Control to obtain a better functionality and performance.

## Finishing

### Mannequins

- Automated working cycles.
- Electronic card.
- Possibility to set nine different cycles, and regulation of steaming and drying time.
- Adjustable shoulder width and height of the dummy. Rotation 360° of dummy support (frame) and controls.
- MA-360 C without boiler to be connected to a central steam supply.
- MA-360 A autonomous, with built-in steam boiler, and automatic water feeding and pressure control.

#### Ironed / Restructured

- Vacuum, up-steaming and blowing ironing tables.
- Available either with built-in electric steam boiler and vacuum unit, or to be connected to an external steam and vacuum supply. It can be supplied in the following versions:
- · MRP VAS: with built-in steam boiler of 7 litres-capacity, with standard board (1200 x 400 x 250 mm).
- $\cdot$  MRP VAS C: without boiler, with standard ironing board (1200 x 400 x 250 mm).

## **Topper**

- Finishing topper for trousers with air-operated waistband and leg stretching device, for central steam and compressed air supply
- Side waistband stretching device.
- Height adjustable leg stretching carriage and stainless steel leg clamps.
- Built-in three-phase fan; air heating device.
- Electronic card for the setting of nine ironing cycles in total. Ironing cycle controlling: steaming time, steam/air time, drying time.
- Three pressure regulators (for leg clamps, waistband stretcher and leg stretching carriage).
- Switch for the exclusion of the leg stretching carriage.
- Manual size indicator. Mechanical airflow regulator.
